PACKING PAPERS

Our packaging papers include a wide range of products from Pure and Imitation Kraft to Waxed Kraft Paper and Tissue Paper.

Packaging papers are ideal for wrapping, separating and covering products to protect them from dirt, moisture and damage during transit and storage. They offer a cost effective solution for a whole range of products including glassware, bottles, textiles, pipes, automotive parts, and more. Whether you or your customers are looking for a form of wrapping, surface protection, outer packaging, interleaving, interlaying or lining, there's a packaging paper to suit.

WHAT ARE KRAFT PAPERS?

Kraft papers relate to a range of papers that are manufactured using an extra chemical treating process on the ground paper pulp, which increases the overall strength of the paper. Versatile, strong and hard wearing, kraft paper is ideal for wrapping and protecting goods.

- + **Pure kraft** made from pure virgin fibres is the strongest paper and offers greater tear resistance
- + **Imitation kraft** made from 100% recycled material offers good protection and is more cost effective than pure kraft
- + **Waxed kraft** provides additional moisture and corrosion protection by the addition of an extra wax layer on pure kraft paper

PURE KRAFT PAPER ROLLS

Pure kraft paper is a superior strength brown paper, made using well bonded fibres to ensure the paper is robust. Because pure kraft paper is made using unbleached pulp, the paper has higher strength and durability which offers superior puncture and tear resistance. These pure kraft paper rolls are fully recyclable and biodegradable. The roll format allows for easy dispensing if used in conjunction with a counter top roll holder.

ITEM NO.	GRAMMAGE	WIDTH (MM)	LENGTH (M)
70167	70 gsm	500	300
16423	90 gsm	750	220
16424	90 gsm	900	220

PURE KRAFT PAPER SHEETS

Pure kraft paper is a superior strength brown paper, made using well bonded fibres to ensure the paper is robust. Because pure kraft paper is made using unbleached pulp, the paper has higher strength and durability which offers superior puncture and tear resistance. These pure kraft paper sheets are fully recyclable and biodegradable.

16413	90 gsm	1150 x 1400	125

PACKING PAPERS

WAXED KRAFT PAPER ROLLS

The addition of a waxed finish provides a paper that can offer a moisture resistant barrier, which makes this paper ideal for use with wrapping oily or greasy items. This moisture protection also acts as a corrosion inhibitor, which makes this perfect for use in the shipping of metallic components and machine parts.

ITEM CODE	GRAMMAGE	WIDTH (MM)	LENGTH (M)
16449	65 gsm	900	100

IMITATION KRAFT PAPER ROLLS

Imitation kraft is manufactured from recycled fibres, which means that it can be a cost effective alternative to pure kraft. Imitation kraft lends itself more for light to medium use and is used mainly for wrapping but can still be effective as a protection layer.

ITEM NO.	GRAMMAGE	WIDTH (MM)	LENGTH (M)
70015	70 gsm	500	300
70020	70 gsm	750	250
70023	70 gsm	900	250
70038	90 gsm	900	225

Tissue sheets

Acid free tissue sheets contain a high percentage of recycled waste, for delicate products that need chemically inert primary wrapping.

ACID FREE TISSUE PAPER

Made using a process to remove all acidic pulp, acid free tissue paper is the perfect wrapping product for delicate and fragile goods going into storage. Acid free tissue paper is also the ideal protective product for precious metals, like jewellery or silverware. Tissue paper is lightweight, soft, flexible and economical, so can be used for interleaving or as void fill in larger packages.

ITEM NO.	GRAMMAGE	DIMENSIONS (MM)	PACK SIZE
16348	18 gsm	450 x 700	480
16349	18 gsm	500 x 750	480

NEWSPAPER OFFCUTS

Newspaper offcuts are the white, unprinted, cost effective paper sheets, more commonly recognised as fish and chip paper. Because the paper is strong, clean, economical and flexible, the paper can be used as a protective wrapping for delicate items for moving through to being a cost effective void fill.

ITEM NO.	DIMENSIONS (MM)	PACK SIZE
46256	508 x 762	640
05764	770 x 1010	260

CUSHIONING AND VOID FILL

Our comprehensive range of cushioning and void-fill materials includes everything from corrugated rolls and bubble wrap to foam and loose fill chips. Whatever the need, we have the right solution to fill voids and cushion the products which can be vulnerable to damage during delivery. So it's important to have the most effective 'in the box' padding to keep items in perfect condition. Our experts are here to help find the ideal solution.

SEALED AIR BUBBLE FILM ROLLS

AirCap® and AirCap®E bubble film rolls are made using barrier film to help air retention, which keeps the film inflated longer than some other films. The AirCap®E bubble 200 meter rolls use a thinner film which allows for a roll size that is similar to some other standard 100 meter rolls, which improves handling efficiencies and reduces costs and is more friendly on the environment. A range of bubble sizes allows for picking the exact type of bubble roll best suited for the product being shipped or the protection required.

CUSHIONING AND VOID FILL

JIFFY BUBBLE FILM ROLLS

The range of small and large bubble films offer an economical, effective solution for void filling, interleaving, wrapping and cushioning. Jiffy bubble film uses a layer of barrier film that seals each air pocket, reducing air escape, giving longer lasting protection and performance. Suitable for both heavy and lightweight items on longer storage or journey cycles.

JIFFY ASTRO® PACKAGING FOAM ROLLS

A low-density polyethylene layer that is a gentle alternative to some more traditional packaging wraps, so is ideal for protecting items that need special care and attention, offering protection from scuffing and abrasion. Available in roll form and in a variety of thicknesses, making it extremely versatile and suitable for a multitude of applications from delicate china to concrete blocks, furniture and consumer electronics and any items requiring gentle cushioning or interleaving protection.

ITEM CODE	THICKNESS (MM)	WIDTH (MM)	SPLIT BY	LENGTH (M)

20141	380 x 435	100

LOOSE FILL CHIPS

An environmentally friendly option for filling packaging voids and offers added product protection. Designed to protect products by absorbing shock and vibration that can be encountered during packing and transit. Choose from the 100% recycled product or from the bio chips that are designed to be compostable in domestic or bio waste.

ITEM CODE	TYPE	BAG SIZE (FT³)
65804	Biodegradable	15
25352*	100% Recycled	15

FOAM PROFILES

A range of foam profiles that are manufactured from polythene foam, free from CFC's, that provide extra protection for edges and corners, which are more prone to damage during transit. The range offers different shapes and profile sizes, that allow for the best shape for the product being packed. Being made from foam, the products are very light, so do not add unwanted weight for transit, but still offer excellent product protection. All of the products are flexible, easy to manipulate and easy to cut, so improve efficiency and speed in packing.

SINGLE FACE CORRUGATED PAPER ROLLS

Corrugated paper rolls are made from 100% recycled paper, with smooth paper on one side and corrugated fluting on the other. The raised fluting offers cushioning and padding, while the smooth paper helps to reduce scratches on delicate surfaces. Being made from paper, the product is lightweight, which makes it ideal for wrapping, packing and void filling.

CUSHIONING AND VOID FILL

GEAMI WRAPPAK EX MINI

Reasonably new to the market, this is a combination of a patented die cut Kraft paper with a tissue interleaf. Whilst wrapping, the die cut paper expands into a 3D honeycomb structure. On release, the cells lock together, items are firmly wrapped and no tape is required. Ideal for protecting 'gift' purchases where presentation is as important as the item itself. Eco-friendly.

ITEM CODE	BOX DIMENSIONS (MM)	ROLL WIDTH (MM)	ROLL WIDTH - INTERLEAF (MM)	ROLL LENGTH UNEXPANDED (M)	ROLL LENGTH EXPANDED (M)	COLOUR
93557	560w x 180d x 240h	508	305	80	135	Brown/White

FILLPAK MANUAL VOID FILL

Turns a single layer of brown paper into a filling material to protect products during shipment. Paper comes in fanfolded packs and is fed through the Fillpak manual desktop machine creating a crumpled piece of paper which can be placed in voids to stop movement within the carton.

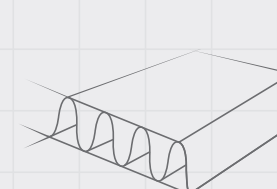

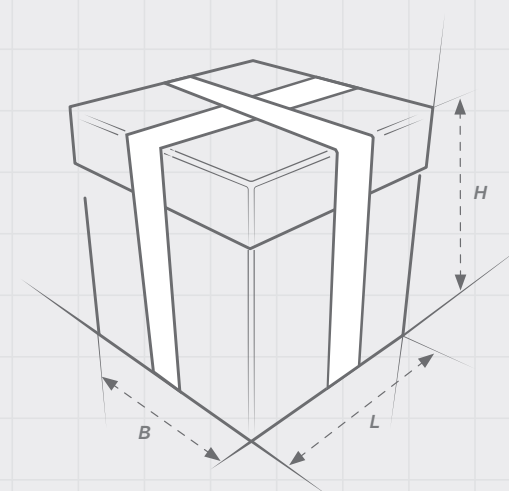

ITEM CODE	DESCRIPTION	DIMENSIONS	PAPER WEIGHT (GSM)	QUANTITY
44044	Fillpak Manual Desktop Machine	540mm x 400mm x 670-1030mm		1
70557	Fillpak TT Kraft Paper	380mm x 500m	50	1
69519	Fillpak TT Kraft Paper	380mm x 360m	70	1

PACKAGING SOLUTIONS THAT
KEEP YOU **AHEAD OF THE PACK**

BOXES

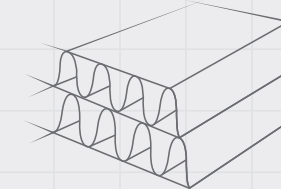

We stock an extensive range of boxes including single wall, double wall and stationery boxes suitable for letterheads, compliment slips and business cards. This economical range is ideal for protecting goods in transit, supplied flat-packed for easy storage.

When measuring a box, the dimensions are given in the following order:-
length x breadth x height (all measurements are internal)

Single Wall

Single Wall corrugated cardboard consists of one fluted medium between two sheets of linerboard.

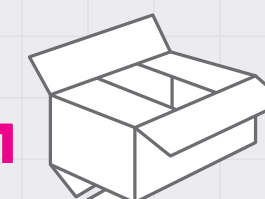

Double Wall

Double Wall has two fluted mediums sandwiched between three sheets of linerboard.

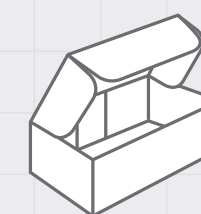

BOX STYLES

Fefco box styles

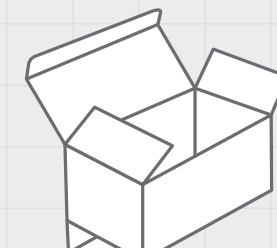

Fefco box styles are what we use to describe what type of box you might need. We use the industry standard codes for different box styles, for example, the most popular box style is 0201 which is a type of box you are fairly used to seeing - it has two outer flaps that meet in the middle top and bottom to tape.

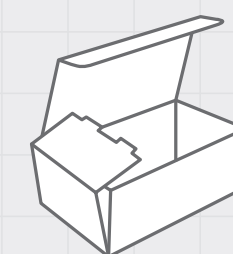

Fefco style 0201
Regular lap end case

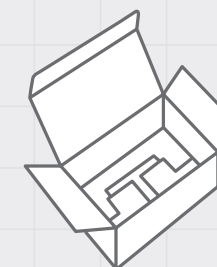

Fefco style 0426
Corner cut folder

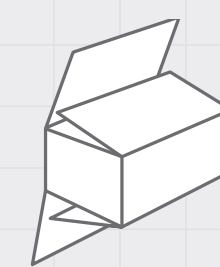

Fefco style 0211
Tuck in top and bottom

Fefco style 0421
Folding box with locking sides

Fefco style 0215
Tuck in top

Fefco style 0203
Regular lap end case fully overlapping flaps

BOXES

SINGLE WALL BOXES

Made from a single layer of corrugated fluting, single wall boxes are perfect for packing, storing and shipping light to medium weight objects. These boxes are supplied flat-packed and in multiple pack sizes, which makes shipping and storage more convenient. Made from a high percentage of recycled material, our single wall boxes are very environmentally friendly and can be fully recycled after use.

DOUBLE WALL BOXES

Made from two strong layers of corrugated fluting, double wall boxes are perfect for packing, storing and shipping medium to heavy weight objects. The extra strength provided by these boxes also make them perfect for shipping fragile goods and can be used for longer term storage requirements. These boxes are supplied flat-packed and in multiple pack sizes, which makes shipping and storage more convenient. Made from a high percentage of recycled material, our double wall boxes are very environmentally friendly and can be fully recycled after use, what's more the extra strength provided by these boxes makes them perfect for multiple use. Multi depth boxes are designed with multiple height options available, simply cut down to the required height, fold and secure - further improving the versatility of the boxes but also ensuring that the boxes fit perfectly to the contents being packed.

AFTER YOU'VE MADE YOUR CHOICE OF BOX, DON'T FORGET YOU MAY NEED THE FOLLOWING:

- + Tape to secure your delivery – available in a range of sizes, thicknesses and adhesive types – **page 13**
- + Tape dispenser guns - large range available to speed things up, please speak to us
- + Document enclosed wallets to secure delivery notes – **page 20**

We hold a wide variety of adhesive tapes including many different types of adhesive suitable for a range of packaging requirements.

We also offer a personalised printed tape with your own logo or company name, which is an ideal way to get your marketing message across quickly and creatively at minimal cost.

When it comes to sending parcels and packages it's important to ensure products are securely sealed in their packaging. Our range of tapes offers everything anyone needs to make sure goods are well protected on every stage of their journey lifecycle.

We provide a range of sealing tapes manufactured from a variety of materials and available in different strengths and sizes.

Our handy tape guide can help:

SELF ADHESIVE TAPES COMPARISON

TYPE	STRETCH	NOISY	TEARABLE	FIBRE TEARING BOND	QUALITY RATING 1-5 HIGH - LOW
Vinyl	No	No	Yes	Yes/High	1 Very good
PP Solvent	Yes	Yes	No	Yes/High	1-2 Very good
PP Hot Melt	Yes	Yes	No	Yes/Medium	2 Good
PP Low Noise	Yes	No	No	Yes/Medium	2-3 Good
PP Acrylic	Yes	Yes/No	No	No/Low	4-5

USEFUL INFORMATION TAPES

There are two main types of packaging tape with various adhesives available to suit your application:

+ Vinyl
Also known as PVC, vinyl tape is thicker than PP and has a smooth and quiet release from the roll. It's easily torn by hand, but doesn't stretch, and is strong enough to take puncture holes. Matt in appearance, this carrier type is only available with a solvent adhesive.

+ Polypropylene (PP)
PP tapes are shiny in appearance and come in a range of adhesives (Solvent, Hotmelt, Acrylic) to cover all packaging applications. They are more cost effective and environmentally friendly compared to vinyl, but are less likely to hold a puncture.

ADHESIVES

+ Solvent – is a natural rubber recommended for sealing medium to heavy loads and is temperature resistant. It's available in standard and low noise as well as for manual or machine applications.

+ Hotmelt – is known as a synthetic rubber suitable for general applications. It's one of the most popular adhesives and is available for manual or machine application.

+ Acrylic – is a water based adhesive available in standard and low noise. It's not recommended for use in cold condition as it can lift, however freezer grade options are available. Acrylic adhesive works best for sticking polythene.

TAPES

POLYPROPYLENE TAPE

Polypropylene (PP) tapes are quickly becoming the packaging tape of choice because of the variety of applications that the tape can be used for and the economical cost to purchase. Polypropylene film carrier is very versatile and can be used for hotmelt, solvent and acrylic adhesives. Polypropylene is also seen as an environmentally friendly product as it is made using waste products from the petroleum industry but also that it is 100% recyclable.

47161	Hotmelt	Clear	48	66	36	Masterin
47162	Hotmelt	Buff	48	66	36	Masterin

POLYPROPYLENE LOW NOISE TAPE

Low noise tapes using a polypropylene carrier that are available with either a solvent or acrylic adhesive. Packaging tapes can be surprisingly noisy to pull off a roll, which can be important when being used in busy packing areas. Solvent based acrylic tapes have good operating temperature ranges and acrylic adhesive is very cost effective.

ITEM CODE	ADHESIVE TYPE	COLOUR	WIDTH (MM)	LENGTH (M)	PACK SIZE	BRAND
69111	Solvent	Clear	48	66	36	Vibac
69103	Solvent	Buff	48	66	36	Vibac

19497	Acrylic	Clear	48	66	36	Advantage
18770	Acrylic	Buff	48	66	36	Advantage

VINYL TAPE

Vinyl or PVC tape is seen as a premium carrier film for packaging tapes because it can be stronger, smoother and easier to pull off a roll, will not stretch and can also be torn by hand. The only adhesive available on vinyl tape is solvent, which also means that these tapes are quieter in use.

ITEM CODE	ADHESIVE TYPE	COLOUR	WIDTH (MM)	LENGTH (M)	PACK SIZE	BRAND

PRINTED WARNING TAPE

We offer a range of printed warning tapes, based on a polypropylene carrier with red text on a white background and also a lane marking tape, based on a Vinyl carrier with yellow and black diagonal stripes. If you need to alert handlers around packages or mark out clear safety routes for staff, we have the right tape for you.

69027	Hazard Warning	Yellow and Black	50	33	6

CROSS WEAVE FILAMENT TAPE

Cross weave filament tapes are glass fibre reinforced tapes, which are extremely strong and secure. These tapes are designed for use on multiple surfaces and where heavy security is required.

ITEM CODE	WIDTH (MM)	LENGTH (M)	PACK SIZE	BRAND
72580	50	50	18	3M
72581	75	50	12	3M

MASKING TAPE

Masking tapes are paper based, pressure sensitive, tapes that can be used for multiple tasks such as D.I.Y. masking and craft. Masking tapes have low adhesion which makes them easy and clean to remove but also offer good resistance to solvents and liquids, which makes them great for decorating and for outdoor use.

SEALED AIR MAIL LITE BUBBLE LINED PAPER MAILERS

An economical practical and lightweight postal bag. Fully lined with AirCap® barrier sealed bubble for superior protection. Self-seal strip on top flap saves time in a busy packing department/post room. High slip film for easy insertion. Easy to write on with excellent label adhesion. FSC certified.

JIFFY AIRKRAFT BUBBLE LINED PAPER MAILERS

Manufactured from a tear and puncture resistant 110 gsm white kraft paper outer with a 32 micron bubble lining these renowned Jiffy branded Mailmisers are lightweight bags with a heavyweight performance. The bubble lining features a barrier seal which keeps the air inside the bubble for longer; strong side welds and a self-seal closure ensure excellent containment.

POSTAL PACKAGING

JIFFY PAPER PADDED MAILERS

This is an extremely tough padded envelope and is ideal for posting more robust and heavy duty products. Jiffy gold self-seal padded envelopes are grease and puncture resistant and are ideal when maximum protection is required as the fibres expand with continued use, providing extra cushioning.

Manufactured from strong 90 gsm Kraft paper with 100% recycled paper fibre lining. Four fold construction with double fold corners and double glued bottom flap and side seam for extra protection and strength. The self adhesive strip forms a firm seal so there's no need for glue or tape.

JIFFY SUPER LITE FOAM LINED PAPER MAILERS

These lightweight but strong fully laminated Jiffy mailers have a non-abrasive foam liner to protect your products from scratches. The paper outer is manufactured from a 70 gsm white kraft paper and the foam is 1.5mm thick. The performance of these foam lined mailers is equal in drop tests to the Jiffy Aircraft® mailer. The compact design means that there are 100% extra per box, pallet and truckload compared to regular Jiffy bubble mailers so you can make efficiencies in handling, storage and distribution. With their crisp white finish and choice of 4 popular sizes these foam lined mailers minimise mailing costs and are perfect for fulfilment, mail order, e-commerce and distribution.

CIRCULAR POSTAL TUBES

The traditional corrugated postal tube, used to send documents and posters securely through the postal service network. Circular postal tubes are designed so that the paper contents can be rolled up, which stops creases and fold marks. Each postal tube comes supplied with white plastic end caps. Made from strong corrugated board, these tubes are reusable and offer supreme product protection.

ITEM CODE	TUBE DIAMETER (MM)	TUBE THICKNESS (MM)	LENGTH (MM)	BOX QTY

TRIANGULAR POSTAL TUBES

These triangular postal tubes are provided flat-packed and in packs, which makes storage more efficient. The triangular shape once constructed offers additional security during transit as they will not roll around, which offers extra protection through the postal network. The more stable storage makes them easier to go through automated reading systems, which allows for quicker label scanning. Made from rigid corrugated board they offer the same protection as the more traditional round tube. Each tube is secured using a self-seal strip which not only allows for quick assembly but also provides extra product security.

BAGS AND SACKS

Our polythene bags offer a cost effective way to protect goods from dirt and moisture during delivery and storage. They're ideal for general, ecommerce and industrial use and are available with and without a grip seal.

BAG TYPES

Our bags come in two types:

- Polythene**
Polythene bags are a cost effective solution to protect items from dirt, moisture and grease.
- Grip seal**
Grip seals keep bags closed and secure so the contents remain safe.

REDUCE COSTS

CUT DOWN WASTE

POLYTHENE BAGS

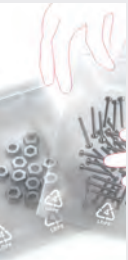

Polythene bags are one of the most cost effective ways to protect goods. Available in multiple film thicknesses, to allow for a variety of product types, the range of clear polythene bags provides an easy way to protect goods from dirt and moisture but also allows you to see the goods inside.

GRIP SEAL BAGS

Grip seal polythene bags are more secure versions of low cost polythene storage bags. The seal offers a secure way to keep the bags closed and contents safe, which makes them perfect for items that are going to be stored for longer periods. The seal is also easy to open, so grip seal bags are perfect for reuse.

GRIP SEAL BAGS WITH WRITE ON PANEL

Offering the same protective qualities of the standard grip seal bags, these polythene bags also come with a printed white surface, allowing a user to write clearly on the outside to detail contents.

FILM

We offer a range of hand stretchfilms designed to hold goods securely on a pallet during transit. Available in blown and cast film, the ever evolving range offers increased efficiency and cost savings. There are many film options available, our experts are here to help you and your customers choose the best solution to maximise performance and maintain load stability.

STRETCH WRAP

Whenever selecting film, the following variables should be taken into account:

+ Type of product

Stretchfilm type is dependent on what you are wrapping. Lighter, more fragile goods require a lower gauge of film to avoid being crushed than heavier, more solid goods that can withstand the pressure of higher gauges.

+ Type of load

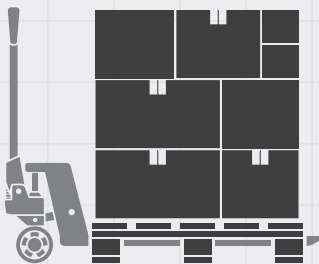

There are two factors that determine load type – the weight of the load and the uniformity of its outside surface. Examples of different load types are shown to the right.

+ Type of equipment

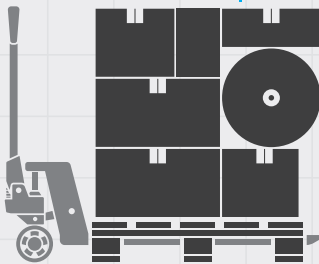

Machine stretch levels will help determine what type of film is necessary to wrap a load. Higher gauges were once required for machines with high pre-stretch levels, whereas today we are selling thinner, tougher films which are able to endure greater levels of stretch whilst maintaining their strength.

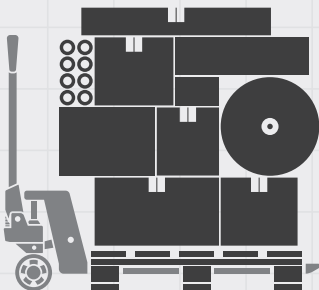

LOAD TYPES

A loads have no irregularities.

B loads have protrusions up to 100mm

C loads have protrusions over 100mm

USEFUL INFORMATION

There are two types of packaging film which are determined by their manufacturing process. Both films offer great benefits, but the choice of which to use should be based on your goals, circumstances and expectations. Generally, both films offer money saving pre-stretch performance and effective load containment. They're also suitable for a wide range of applications.

+ Cast Film

Cast film is made when sheets of heated resin are fed through a rolling path using chilled rollers that cool and solidify the film. Compared to blown film, cast is clearer which offers better clarity of the product and labels underneath. It also unwinds quieter and is soft and easy to stretch, but strong enough to resist tearing.

+ Blown Film

Blown film is made when heated resin is blown in to a bubble which is transferred in to rollers and cooled by the surrounding air. Compared to cast film, blown is tough, resilient and very resistant to puncture. It also has an exceptional cling, but makes more noise unwinding.

CAST HAND STRETCHFILM

Cast hand stretchfilms offer very good film clarity, allowing for product visibility during transit. Cast films are also very quiet when being unwound from a roll, which makes it good for areas of high packing activity volumes. Cast films are also more elastic, so can offer better stretch abilities. Extended core hand wrap allows users to apply film more quickly and easily, when using hand dispensers.

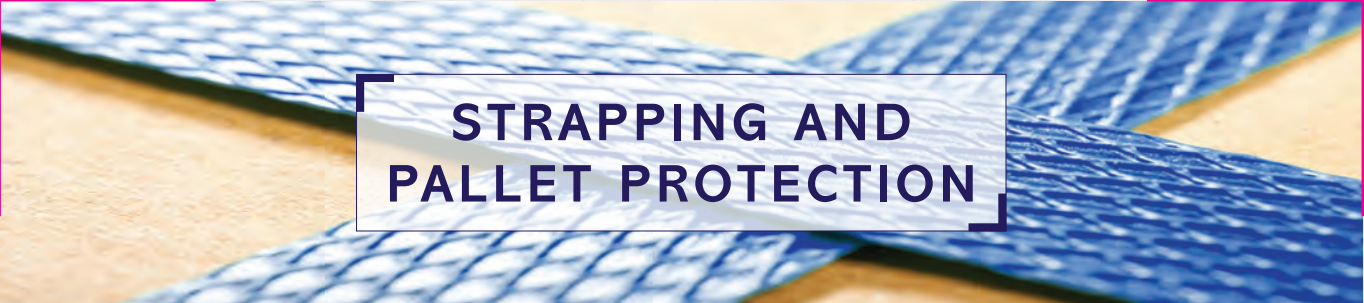

ITEM CODE	THICKNESS (MU)	WIDTH (MM)	LENGTH (M)	CORE TYPE	BOX QTY
99543	14	400	300	Standard	6
99544	16	400	300	Standard	6
99540	16	500	300	Standard	5
99541	19	500	300	Standard	6

52668	19	400	300	Extended	6
52669	22	400	300	Extended	6

CAST HAND PRE-STRETCHFILM

Using pre-stretch cast films makes it possible for users to achieve the same levels of wrapping and in turn, load stability and product protection, but can do so using less film by weight thus reducing the amount of packaging film required. All of the other properties of a pre-stretchfilm are the same as standard cast hand film.

ITEM CODE	THICKNESS (MU)	WIDTH (MM)	LENGTH (M)	CORE TYPE	BOX QTY	PALLET QTY
68518	7	400	600	Standard	-	360
13753	7	400	600	Extended	6	-

BLOWN HAND STRETCHFILM

Blown hand stretchfilms offer excellent puncture resistance, which makes them great for wrapping odd shape pallets or products. Blown films also offer superior tack over cast films, which makes them stick to pallets and goods easier, which speeds up the wrapping process. Blown films are not as elastic as cast films, so it is easier to apply larger force on packed pallets, which makes the film perfect for use on heavier pallets and goods.

PALLET TOP SHEETS

Polythene top sheets help to protect goods that have been loaded onto a pallet, ready for shipping. Quick and easy to use, simply put on top of packed goods and then secure in place by wrapping and then strapping the pallet. The combined packaging will help to protect the goods from moisture, dirt and dust.

ITEM CODE	THICKNESS (MU)	WIDTH (MM)	FOLDED WIDTH (MM)	SHEET LENGTH (MM)	ROLL LENGTH (M)	ROLL QTY

16641	40	1800	900	1600	-	200 sheets / pack

Our range of strapping and pallet protection materials include hand and machine strapping bands and edge protectors. Available in polypropylene and polyester material our strapping bands come in a selection of colours and offer an alternative to stretchfilm for securing boxes during transit. Combined with the edge protectors to strengthen loads and prevent damage.

STRAPPING BAND

Plastic strapping is used to help secure goods on pallets to keep them stable for transit, thereby helping to reduce movement and damage. Polypropylene strapping is perfect for light to medium weight goods and polyester is designed more for heavier loads.

ITEM CODE	MATERIAL	COLOUR	WIDTH (MM)	LENGTH (M)	BREAK (KG)	CORE TYPE

63890	Polyester	Green	15.5	2000	401	Card

PALLET CARDBOARD EDGE PROTECTORS

Cardboard edge protectors are used when stacking pallets to help to strengthen loads and make them more stable for shipping. Cardboard edge protectors can also be cut down to be used inside boxes to improve strength or put onto pallets to help prevent box damages through strapping or stretchfilm securing.

BESPOKE PACKAGING AND USEFUL INFORMATION

BESPOKE PACKAGING

Don't worry if you can't find what you're looking for, our account managers are here to help with any bespoke packaging requirements or ideas you may have.

More customers are putting greater emphasis on their postal packaging. Bespoke options may be required by you or your customers for one of many reasons and it provides you with an opportunity to offer a service and solution specific to them.

Reasons to opt for a bespoke option could include:

- + It's seen as a key differentiator for their brands
- + For online retailers, packaging is the first interaction customers have with the brand
- + Packaging is significant to the customer experience
- + Consumers increasingly care about packaging
- + There's a 'going green' focus on recycled and biodegradable materials
- + Cost and space efficiency
- + User friendliness, ease of opening and can be used for returns

We can offer help and advice, whether it's as straight forward as a new bespoke printed box or as involved as a full packaging assessment. **Contact us now.**

BESPOKE PACKAGING AND USEFUL INFORMATION

Before packing any object, ask yourself
the following questions:

How big is it?

The size of the object will influence the amount of protection it requires; small lightweight items will have different needs to large cumbersome items. Consider carefully about the size and any problems this might cause.

What shape is it?

Is there anything that may require extra support or cushioning?

What does it weigh?

A very important consideration. A computer for example would require more cushioning than a calculator would.

How fragile is it?

Is the product likely to break if dropped or subjected to aerial sorting?

How is the product to be shipped?

Is there more than one item to be packaged? If there is more than one how fragile are they collectively?

Is there a special surface finish?

Highly polished surfaces are prone to scratching and require protection.
